

TIPS & TRICKS

1. Hold the Cameras Horizontally

THIS IS REALLY IMPORTANT!!! You need to hold the cameras sideways (as per the sticker on the camera) otherwise the footage will be a vertical strip in the middle of your TV and therefore unusable. TV's need a landscape picture. If you give them a portrait picture we will not be able to use the footage.

HOLD YOUR CAMERA SIDEWAYS!!!!

2. Check Your Cameras Are Working

As soon as your cameras arrive in the post, make sure that they are working. There shouldn't be any problems as we check them before dispatching. If you check them on the day of arrival it will give us a chance to get a replacement out to you in time!

3. Charging Your Cameras

Your cameras will come fully charged. If you do find that you want to give them an extra charge throughout the wedding day you can plug them into any USB point (Computer/Laptop). Just flip out the USB arm and plug in - no cables needed!

4. Low Light

These cameras work better when there is enough light around. Try to stick to finding the light!

5. Keeping The Shot Steady (The 6 Second Rule)

Try to keep each shot as steady as possible and hold the camera in 1 position for at least 6 seconds before changing position.

6. Don't Change The Settings

The settings on the cameras are optimised for what we require when we edit. Please do not change these settings as it may have an impact on the quality of your final video. The only buttons you should need to press are the Power Button and the Record Button. Please feel free to email us or call us if you have any questions on how to operate the cameras.

7. Shoot The Details

Try to shoot as many detail shots as possible ie: Brides Shoes, Table Decorations, Wedding cake etc. The more interesting shots you get... the prettier your wedding video will be!

8. Don't forget to video the Bride & Groom

This one may sound silly but you would be amazed how many people forget to take lots of video of the Bride & Groom. Perhaps they feel in the way or simply get carried away videoing their other friends. Who knows?! To get a really great wedding video, we must have lots of coverage of the happy couple! Please don't forget!

9. Don't Cover the Microphone!!

There is a small microphone on the front of the camera (the same side as the lens). Make sure you don't cover it with your finger, especially for speeches and the ceremony. If you do then the sound may be unusable and we won't be able to use the footage.

10. Get Mini Interviews

Try to get mini interviews of various people throughout the day. The cameras record audio so try to get key people to talk about the day and what they are up to.

11. Avoid shooting too much of the same thing

Try to capture highlights of the day rather than using up all of the memory with one thing. ie: filming the whole of the ceremony or filming all of the speeches. You ideally want clips throughout the whole day. Key moments like the first dance, cutting of the cake etc are all brilliant to have.

12. Recorded Delivery Return Postage

When returning the cameras, make sure to send them recorded delivery. They will be full of all of your magical memories so we wouldn't want them getting lost in the post!

13. Recommend us to Family & Friends

Pass on your video link & recommend us to family & friends. We hope you've enjoyed your Edit Your Wedding Experience :)
